<div class="df_qntext">Can San Diego develop a pumped storage energy project?

When energy demand is high,the stored water is released downhill to turn turbines that produce energy. The Water Authority and City of San Diego are evaluating the feasibilityof developing a pumped storage energy project at the City of San Diego's San Vicente Reservoir near Lakeside.

<div class="df_qntext">How much energy would a San Diego water reservoir store?

It would store 4,000 megawatt-hours per dayof energy (500 megawatts of capacity for eight hours),enough energy for about 135,000 households. The San Diego County Water Authority,which owns approximately two-thirds of the reservoir's water storage capacity,is partnering with the City on this potential project.

<div class="df_qntext">How many cargo terminals does San Diego Port have?

The Port has two cargo terminals,the Tenth Avenue Marine Terminal (TAMT),a 96-acre facility in San Diego and the National City Marine Terminal (NCMT),a 135-acre complex in National City. Cargo received at our two cargo terminals originates from countries around the world.

<div class="df_qntext">Is San Diego a military strategic port?
