

How does Senegal support regional energy cooperation?

Senegal supports regional energy cooperation as a member of the West African Power Pool (WAPP) and is a member of regional organizations to develop hydroelectricity resources on the Senegal (OMVS - Senegal River Basin Development Organization) and Gambia (OMVG - Gambia River Basin Development Organization) rivers.

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan Sénégal 2035, or the Emerging Senegal Plan.

Will Senegal become an oil and gas producer in 2024?

This partnership could mobilise up to EUR 2.5 billion to support Senegal's efforts to achieve universal energy access and strengthen a resilient, secure and sustainable energy system that fosters sustainable development and economic growth. In 2024, Senegal is expected to become an oil and gas producer.

How has Senegal reformed its energy sector?

Since the launch of the Plan Sénégal 2035, Senegal has adopted reforms designed to attract foreign investment in its energy sector and boost participation from the private sector, while leveraging significant support from development finance institutions.

Will Senegal's economy grow six-times bigger in the AC?

Senegal's economy could grow six-times larger in the AC while limiting growth in energy demand to three-times its current level by utilising new gas resources and boosting the use of renewables in power. In the AC, gas meets a growing share of energy demand while traditional use of biomass starts to decline in rural areas. IEA. Licence: CC BY 4.0

Can Senegal achieve its broader economic objectives?

Senegal's significant efforts to develop its energy sector and deliver energy access to more people are laying important groundwork for the country to achieve its broader economic objectives, according to a new report from the International Energy Agency (IEA).

Production d'énergie électrique En 2018, 21 148 GWh ont été produits dans l'espace UEMOA, dont GWh par le Sénégal. Dans l'UEMOA, 4 585 l'électricité est générée principalement à partir des produits pétroliers (38, du gaz naturel (35 %) et de l'hydroélectricité (21 %). Le charbon minéral et le solaire photovoltaïque ne représentent respectivement que 2 % et 2 % de ...

With the development of infrastructure (bridges, roads), they also facilitate the logistics and distribution of energy. Senegal is making considerable efforts in the field of renewable energy, which now accounts for 30% of the energy mix. Upstream oil and gas operators, to mitigate greenhouse gas emissions, are adopting technologies and ...

Nevertheless, Senegal's energy consumption has been growing rapidly at + 3.6% / year on average⁴, since 2000, due to the combined effects of economic and demographic growths. In addition, significant offshore oil and gas reserves have recently been discovered

Moreover, SENELEC also buys the surplus of renewable energy generated by self-producers. In 2013, the Republic of Senegal adopted the strategic energy plan, which aimed to increase the energy mix dynamic in the country for a five years (2013-2018). The energy mix refers to the development of power generation from coal, gas, hydro, solar and wind.

Nearly 540,000 people in Senegal will get access to clean and affordable power following the launch of two solar photovoltaic (PV) plants, financed by IFC, the European Investment Bank and Proparco, under the ...

Senegal's Energy Transition Strategy details several decarbonization recommendations centered on the country's gas-to-power transition, including innovative approaches to utilize gas infrastructure to ...

Senegal has major commitments towards increasing generation and usage of clean energy. The 2018 Gas-to-Power strategy aims to reduce national energy dependence on oil and coal by incentivising investment in gas as a transitory fuel in the energy transition. Several projects are underway to support Senegal's energy ambitions,

Energy-efficient biomass cookstoves (EEBCs) are promoted as intermediate technologies that would alleviate the environmental, socio-economic and health burdens of traditional cooking (Köhlin et al., 2011; Shindell et al., 2012; Bailis et al., 2015). While EEBCs are not emissions-free, they are typically much less expensive to use than clean-fuel stoves and ...

Energy Policy Review 2023: A Catalyst for Sustainable Growth Senegal's commitment to developing its energy sector takes center stage in the International Energy Agency's (IEA) Energy Policy Review of Senegal 2023. The report underscores the pivotal role of energy in Senegal's 2035 strategy for sustainable development, known as the Plan Sénégal ...

Senegal's significant efforts to develop its energy sector and deliver energy access to more people are laying important groundwork for the country to achieve its broader economic objectives, according to a new report from the International Energy Agency (IEA). The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart ...

The Republic of Senegal is making progress to expand its renewable energy sector under the World Bank Scaling Solar Program. As it stands, 70.4% of the Senegalese population has access to electricity, of which less than a third is generated from domestic sources - total installed capacity currently sits at 1,555 MW.

Energy Balance: total and per energy. Senegal Energy Prices: In addition to the analysis provided on the report we also provided a data set which includes historical details on the Senegal energy prices for the following items: price of premium gasoline (taxes incl.), price of diesel (taxes incl.), price of electricity in industry (taxes incl ...

Senegal's fossil gas expansion plans are inconsistent with a Just Transition and risk creating stranded assets and high levels of unemployment. The oil and gas sector likely has significant influence on the government, while the impact of the renewable energy sector, which is still in its infancy, is likely limited.

Clean Energy Market Assessment for Senegal 1 . EXECUTIVE SUMMARY Electricity supply in Senegal is characterized by: o Insufficient generation and storage capacity; o High generation ...

Senegal already has 0.4 GW of total renewable energy installed capacity and has recently pledged to increase the share to 40 per cent by 2030 within the framework of the JETP, whose funding to be mobilised can be a key enabler for Senegal to also meet its conditional targets under the NDC.

Senegal plans to make a significant energy leap with the final investment decision for the Yakaar-Teranga gas project expected in early 2025. Société des Pétroles du ...
