Can a solar farm be developed in Brunei?

The new solar farms may be developed through public-private partnerships as the ministry seeks to reduce the government's financial burden. Brunei has set a target of generating 100 MW of solar energy by 2025 as part of the government's initiative to slash greenhouse gas emissions by 20 percent over the next 10 years.

What are the major solar installations in Brunei?

Major active solar installations in Brunei include the country's first, Tenaga Suria Brunei, launched in 2010 with a capacity of 1.2 MWp, and Brunei Shell Petroleum's 3.3 MWp solar plant, launched in 2021 to supply power to its headquarters. Both plants have plans for further expansion.

Does Brunei have a sustainable future?

Brunei is targeting 30% renewable energy in total power generation mix by 2035, with 200 MWp of solar energy by 2025. The launch event also saw the release of Hengyi's 2023 ESG Report, which highlights their progress in environmental sustainability, social responsibility, and governance.

How will solar energy benefit Hengyi industries' petrochemical refinery?

"The solar energy generated through Project SINAR will not only support the energy needs of Hengyi Industries' petrochemical refinery, but will also contribute to Brunei's national power grid when required, enhancing energy sustainability across the nation," said Qiu Jianlin.

What is the largest foreign direct investment project in Brunei?

Hengyi is the largest foreign direct investment project in Brunei, exporting 9.46 million metric tonnes of petrochemical products worth US\$4.08 billion since its oil refinery started operations in November 2019.

What percentage of oil and gas workers are locals in Brunei?

Bruneians made up 72 percent of the workforce in the oil and gas sector, below the Bruneianisation target of 90 percent. The government enforced the Bruneianisation directive in 2018, requiring oil and gas operators to ensure at least 90 percent of their workforce are locals.
