

Is there a wind energy system in Sierra Leone?

There is a wind energy system of 5kw in Sierra Leone,located in the Bonthe District,along the south coastline area. Energy consumption in Sierra Leone is dominated by biomass,which accounts for over 80% of energy used.

Does Sierra Leone have a balance between electricity demand and supply?

Despite various interventions by the government,a balance between electricity demand and supply has yet to be achieved. Using the Long-range Energy Alternatives Planning System (LEAP),this work assesses Sierra Leone's energy supply and demand for 2019-2040.

Do energy statistics exist for Sierra Leone?

Although no consolidated set of statistics exists for the total Energy situation of Sierra Leone,energy statistics are difficult to obtain,especially for renewable energy. Conventional thermal energy production and consumption patterns have been reported.

Does Sierra Leone have a long-range energy alternative planning system?

Using the Long-range Energy Alternatives Planning System (LEAP),this work assesses Sierra Leone's energy supply and demand for 2019-2040. We developed three case scenarios (Base,Middle,and High) based on forecasted demand,resource potential,techno-economic parameters,and CO 2 emissions.

Can Sierra Leone address energy demand by 2040?

We believe that this may serve as a reference to the government of Sierra Leone for mapping out strategies for addressing energy demand by 2040. Furthermore, this work can be further expanded by incorporating energy efficiency and energy management strategies.

What type of energy is used in Sierra Leone?

In Sierra Leone,over 80% of energy is consumed as biomass,with the largest source being wood fuel and charcoal.

Members of the Programme of Integrating Renewable Energy, including Stephanie Hirmer, Hindolo George-Williams and John Rhys, are starting a new project, ...
