

This process enables intense color options without sacrificing high energy efficiency. The solar modules receive a coating that ensures the desired color impression with targeted light refraction. At the same time, most of the light can reach the surface of the solar cell unhindered and generate energy there. ... Megasol Energy Ltd. Headquarter ...

The hail resistance of Megasol Energie AG's PV modules is regularly tested and certified by an external testing laboratory. During such a test, the modules are bombarded with the corresponding ice balls at an angle of 90 and 45 degrees in such a way that the natural impact of hail on roof and fa&#231;ade modules is simulated. ...
