What does pxise stand for?

PXiSE (pronounced 'pice'), a member of the Yokogawa Group, develops next-generation grid control technology. PXiSE software solutions unlock the potential of distributed generation to improve grid reliability and increase renewable energy output, while helping ensure system balance and power quality. 2024 PXiSE Energy Solutions.

What is pxise energy solutions?

By clicking "Accept", you consent to the use of ALL the cookies. Do not sell my personal information. PXiSE Energy Solutions enables utilities, campuses, and communities to hit their clean energy goals by giving grid operators control of unlimited renewables and distributed energy resources while providing safe and reliable power.

Why should you use pxise?

PXiSE provides the most effective software for managing the complexities arising from a 21st century grid. We enable utilities, campuses, and communities to hit their clean energy goals by giving grid operators the control they need to manage unlimited renewables and distributed energy resources while still providing safe and reliable power.

What is pxise software?

Who is pxise?

Founded in 2016 and headquartered in San Diego, PXiSE has a global portfolio of 1.5+ GW of contracted assets encompassing, solar, wind, storage, electric vehicle, and thermal assets.

What makes pxise unique?

PXiSE is very unique. Unlike most DERMS and microgrids, PXiSE has unique features with advanced control technology-- it's one of a kind... It's beyond what is possible today. PXiSE is like a symphony and you need a conductor to make the music harmonized. One is technical and the other is the big picture, instead of a siloed solution.

PXiSE software unlocks the potential of distributed generation to improve grid reliability and resilience, while increasing renewable energy output and helping ensure system balance and power quality.

PXiSE develops software that enables utilities and other grid operators to deliver reliable and stable power by managing renewables and distributed energy resources (DERs) in real time.

PXiSE (pronounced "pice"), a member of the Yokogawa Group, develops next-generation grid control technology. PXiSE software solutions unlock the potential of distributed generation to improve grid reliability and increase renewable energy output, while helping ensure system balance and power quality.

The PXiSE DERMS helps utilities control the increase in renewable energy assets, batteries and electric vehicles. It coordinates both front-of-the-meter (FTM) and behind-the-meter (BTM) distributed energy resources (DERs) ...

Customer Goal . The operators at the Slate plant face the challenge of managing five individual utility-scale solar PV plants, each governed by its own power purchase agreement (PPA). These plants, part of one of the largest solar PV and battery storage sites in the U.S., interconnect at a single point of interconnection (POI). This project required a solution where the five individual ...

PXiSE Energy Solutions, a Yokogawa company, is excited to announce a pivotal leadership change that marks a new chapter in its commitment to innovation and growth.
