Solar cells made from perovskite are about to break through - the cheap and versatile material is almost made for the efficient generation of solar electricity. However, the new solar cells are not yet robust enough for real use. Researchers from the Swiss Federal Institute of Technology Lausanne (EPFL) and the University of Fribourg are working on fine-tuning the perovskite ...

Insolight is an energy company that develops and manufactures solar panels. The technology, called planar optical micro-tracking, allows to concentrate sunlight on tiny solar cells, without any tilt. This makes the use of high efficiency space-grade solar cells affordable, whereas normally there are too expensive to be spread on the full sunlit area.

Solar panels, which effectively function as the roof, and offer weather protection (in-roof installation), are

Solar cells companies Switzerland

more expensive. There are several well-known Swiss manufacturers who manufacture and deliver panels for almost every type of roof. Solar tiles, panels integrated into the facade or special designs are also available on the market.

However, our solar panels demonstrate a lower angular dependence, which makes them eligible for facades or similar places where the angle towards sunlight is not optimal. For the same reason our solar panels provide smooth energy production from sunrise to sunset, and over the year as the sun's path changes. ... Switzerland
