

Solar companies that rent your roof Japan

Solar leases are a solar financing option that allows homeowners to use solar electricity without having to pay the upfront cost of installation. Instead, a homeowner makes a monthly lease payment to the solar company in exchange for the solar energy. The solar panels reduce your electricity bill, and the lease payment is designed to be lower than your pre-solar electric bill.

As solar is becoming cheaper and more popular, choosing among the many solar energy companies in Thailand is getting harder, especially so as each installer may offer you different packages, services and energy solutions. Finding the right solar installer for your roof is important in ensuring a hassle-free installation that you are satisfied with.

Rooftop leasing schemes work as follows. Power generation companies rent rooftops from the owners of suitable facilities and install solar panels at their expense. Then they obtain income by selling electricity under the FIT scheme, while paying rent on the rooftops to the facilities' owners.

We have panels on our roof. They aren't leased, the company is leasing our roof. literally the only issue with them would be if you wanted to do a loft conversion. And I'm not sure even that would be a problem. they've been up since 2015. We've had no need to have dealings with the company at all. We get all the electricity from them.
