

Solar container vent design

<div class="df_qntext">Do shipping containers have ventilation holes?

Most shipping containers will have built-in holes to act as ventilation. But the problem is that these holes aren't enough for this situation. It's best to install a ventilation system such as having intake vents, louver vents, or even a window.

<div class="df_qntext">What is a shipping container vent Kit?

The shipping container vent kit by CON-VENTS is an effective product for preventing moisture from building up. It comes with two vents that are designed to each end for cross ventilation. This product itself is designed to cover a 20 feet container. It can be placed anywhere, such as the side doors or windows.

<div class="df_qntext">Where should a shipping container vent be installed?

You need a balance of intake vents and exhaust vents to make any ventilation system work well. These 2.5" intake vents are the ones we recommend you install on your shipping container near the floor so air movement will come in low and help push the hot air out of the exhaust vents at the top of your shipping container.

<div class="df_qntext">How many vents should a steel shipping container have?

If you plan to store equipment you don't want to get rusted or damaged due to moisture and heat inside your steel shipping container, you need to ventilate your container sufficiently. We recommend 1-2 vents for every 20' of container. Remember, that uniform air movement throughout your entire container is important.

<div class="df_qntext">What is the AdaptAIR shipping container vent adapter made of?

The AdaptAIR shipping container vent adapter is 20-gauge, single-piece stamped steel coated in an industrial gray epoxy. We engineered this product to become structurally supportive when installed. What is included with AdaptAIR for installation?

<div class="df_qntext">Does a shipping container home need a ventilation system?

One reason that a shipping container home will require a ventilation system is because it may overheat, and moisture-sensitive goods can be damaged. Most shipping containers will have built-in holes to act as ventilation. But the problem is that these holes aren't enough for this situation.

Boost the performance of your solar-powered vent fan with extra, high-efficiency intake vents. Designed to work in tandem with your powered exhaust system, these vents allow fresh air to enter the ...

Eliminate moisture and excess heat with our state-of-the-art computer-modeled frame design which adapts the Canada Go Green 4 Seasons Solar Vent (included) to corrugated shipping container ...
