It is not uncommon to read about lists of project developers for UK solar that are wildly inaccurate, and miss the whole point about what a project developer is. All too often, people erroneously assume that if a well-known solar company announces they interconnected a solar farm, then by default they developed it. Not so.

The most successful model employed by EPC-capable companies within the UK solar market has been from those getting involved at the initial planning process (or acquiring approved sites), doing the lead EPC work in-house, and then flipping SPVs to third-party portfolio asset holders. This accounts for almost half of the installed capacity from ...
