In total, there are 393 panels at CFM and 784 solar panels at Dechencholing project site, generating approximately, 380000KW hour units in the last 7 months, generating an income of roughly Nu. 2.7 million. One panel can light about 32 light bulbs (of 20watt).

What is a Solar Panel Cleaning Equipment? Solar Panels generate power by absorbing sunlight. The more they absorb the sunlight, the more energy they can produce. But problems with efficiency in power production arise when dust and other impurities get stuck on the surface. These impurities can block the sunlight from reaching the solar cells. To tackle this issue Solar ...
