What is IFC's rooftop solar energy facility in Gaza?

The Palestine Real Estate Investment Co's (PRICO) rooftop solar energy facility is IFC's first large-scale solar energy installation in Gaza and is supported by the IFC-Canada Climate Change Program.

Does Palestine have a potential for solar power?

The Palestinian territory has a high potential for solar power generation, as it receives around 3,000 hours of sunshine per year. As a result, the Palestinian Authority is looking to attract investments in the renewable energy sector. Inauguration of the solar power plant in a school in Beit Hanina, Jerusalem.

How did IFC finance the PRICO solar project?

In 2018, IFC structured an innovative debt financing package for the PRICO Solar project to promote the installation of solar panels on the rooftops of several buildings belonging to the Gaza Industrial Estate, Gaza's largest business park.

Can Palestinians achieve 10 percent of electricity production from renewable sources?

The Palestinian Energy Authority issued a renewable energy strategy in 2012 that aims to gradually achieve 10 percent of electricity production from renewable sources by the end of 2020. According to the strategy, this goal can be achieved if certain prerequisites are attained.

What is the largest solar installation in Gaza?

PRICO is the largest solar installation in Gaza and the first one for which an ad-hoc grid integration solution has been developed with the grid operator to ensure power evacuation and 24/7 continuity of supply. This is a standard-setting benchmark that is replicable and scalable in other locations.

What is IFC's PRICO and Massader solar project?

Innovative financing for the PRICO and Massader solar projects is part of a larger effort by IFC to create viable markets for renewable energy in developing economies. Both projects enhance capacity building of local institutions, establishing the foundation for private sector participation and long-term, self-reliant growth.
