British Gas has unveiled four new energy efficiency services, with solar and battery installations a core pillar for the new business unit. Other pillars include home health checks, an improved Hive EV charger and insulation installation.. These pillars will play a pivotal role in the energy and home services provider's offerings to bolster residential net zero prospects.

Your home's value could increase by up to 10-20% as a result of your solar energy system. When and if you decide to sell your home in the future, you can include solar panels as an additional selling point in your home's description. Your solar energy system can be easily transferred to the new owner when you sell your home.

If you do not need the solar system to power all your home appliances temporarily, it is also a smart choice to consider using solar AC units. It will save on your electricity bill. Air conditioning seems to have become a necessity for modern households, accounting for 20%-30% of the total electricity bill. In summer or winter, you can use air conditioning to keep your home comfortable.
