"The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030." The project represents an investment of around £30m across the 40-year anticipated life of the project, with no public investment.

Manx Solar Electrical undertakes every aspect of the installation, including annual servicing plus all requisite maintenance work. With utility prices rising and green issues climbing the agenda, there has never been a better time to invest in alternative energy sources.
