A home solar system, also known as residential solar, is a system that converts sunlight into usable energy for residential properties. It comprises solar panels, inverter(s), and a battery (optional) and is also connected to the main power grid.

A home solar energy system costs about \$13,400 after the 30% federal tax credit and typically saves around \$1,500 annually. The installation cost of solar panels and electricity bill savings depend on local electricity rates, the solar company you choose, how much sunlight your roof gets, and the rebates and tax incentives

Solar system for home use Guadeloupe

available near you. ...

A grid-tied solar system, also known as a grid-connected solar system, is connected to the electrical grid and provides power to your home while also sending excess power back to the grid. In this system, you can use solar power during the day and draw power from the grid when your solar panels are not producing enough energy.
