

Sri Lanka real goods solar living center

How much solar energy does Sri Lanka have?

According to the Sri Lanka Sustainable Energy Authority (SLSEA), Sri Lanka has an average solar insolation of 4-6 kWh/m²/day with over 250 sunny days annually. As of 2020, SLSEA has installed over 16 MW of grid-connected solar PV across the country.

Why does Sri Lanka need a solar PV system?

The push for solar PV systems, both at the residential and industrial levels, reflects a commitment to harnessing the potential of solar energy. By providing solar energy solutions in Sri Lanka, Altavision is actively contributing to the broader efforts to enhance the share of renewable energy in the country's overall energy consumption.

What is sustainable living in Sri Lanka?

Sustainable living in Sri Lanka refers to lifestyles and practices that aim to reduce environmental impact and resource consumption while supporting social equity and economic growth. It involves holistic, long-term solutions that meet the needs of the present without compromising the ability of future generations to meet their needs.

Why is eco-friendly technology important in Sri Lanka?

Embracing eco-friendly technology is crucial, requiring awareness campaigns and support for innovation to integrate green technologies into various sectors. Together, these efforts contribute to a more sustainable and resilient Sri Lanka, harmonizing economic, environmental, and cultural dimensions of sustainable living.

Why is solar energy important in Sri Lanka?

By providing solar energy solutions in Sri Lanka, Altavision is actively contributing to the broader efforts to enhance the share of renewable energy in the country's overall energy consumption. It's an exciting time for sustainable practices and clean energy initiatives in Sri Lanka! How is solar energy utilized in Sri Lanka?

Does Sri Lanka have a sustainable future?

In line with its sustainability vision for 2030, the Sri Lankan government has set ambitious goals to propel the nation towards a greener and more sustainable future. The initiatives include achieving 70% renewable electricity, doubling forest cover, and transitioning 25% of farms to organic agriculture.
