

Storage bess Canada

What's going on with Bess in Canada?

Elsewhere in Canada, other BESS-related advancements have been pouring in. In May, the government of Ontario completed the largest battery storage procurement in Canadian history. It secured 2,195 MW from ten projects ranging in size from 9 MW to 390 MW.

How much energy storage does Canada need?

Canada's current installed capacity of energy storage is approximately 1 GW. Per Energy Storage Canada's 2022 report, *Energy Storage: A Key Net Zero Pathway in Canada*, Canada is going to need at least 8 - 12 GW to ensure the country reaches its 2035 goals.

How important is energy storage to Canada's transition?

Energy storage - BESS and beyond - is going to be critical to Canada's transition, so we know we need to get these projects right. Together we will. You can find a copy of the full report [HERE](#) on ESC's website. Canada's current installed capacity of energy storage is approximately 1 GW.

How does Bess work?

Our BESS solutions are operated by our team of experienced power asset managers who use intelligent battery software to optimize wind and solar production. They also use utility rate structures, usage history, and weather patterns to determine when the stored energy is discharged.

How many X Bess projects have Teric completed?

Achievements include: TERIC has successfully designed, constructed, and commissioned 6 X BESS projects that are now in operation. Majority of all utility scale battery projects in operation in Alberta today were originated and developed by TERIC. TERIC originated the first portfolio of battery energy storage projects in Canada.

Where is Bess located?

The BESS is located at SaskPower's Fleet Street substation in Regina, which is the capital city of Saskatchewan. The Canadian government supplied approximately \$13 million of the project's total \$34 million cost.
