

Who surveys the solar market in Switzerland?

The Swiss Federal Office of Energy has been surveying the solar market in Switzerland for more than 20 years. Due to this long experience the quality of the data has been maintained, thanks as well to all the installers and distributors who are willing to complete the annual questionnaire.

Why are solar panels becoming more popular in Switzerland?

The solar photovoltaic (PV) based solar panels represent the largest segment of the Swiss solar energy market due to the increasing commercial and residential installations of solar modules. The Swiss government announced in 2019 that it would achieve net-zero greenhouse gas emissions by 2050.

Will photovoltaics boost renewable power production in Switzerland?

A new monitoring report of the "Energy Strategy 2050" in 2019 shows that the increase in renewable power production in Switzerland is on track to reach the 4.4 TWh benchmark for 2020 (see graph above - the value for 2019 is 4.19 TWh). The contribution from photovoltaics is thereby above the long-term scenarios.

How much solar power can a Swiss house generate?

According to a recent study by the Swiss Federal Office of Energy (SFOE) based on data from a solar potential cadastre ([sonnendach.ch](http://sonnendach.ch)) and meteorological data, Swiss houses and factories could generate up to 67 TWh of photovoltaic power per year (current power consumption is around 60 TWh).

When will bifacial solar panels be available in Switzerland?

In February 2022, Megasol Energie AG announced the launch of the 500W bifacial solar module with an estimated power conversion efficiency of 23.2%. In May 2021, the Swiss government announced that it had allocated CHF 470 million for solar rebates in 2021.

Is photovoltaics a key pillar of the future Swiss electricity supply?

Electricity production from photovoltaics is one of the key pillars in the strategy for the future Swiss electricity supply.

Noah Heynen, the head of Helion an installer of solar systems, welcomes the proposal and says that the technology for throttling solar systems is already in place. In ...

Finally, the platform integrates with the work of the Solar Digital business unit that deals with energy optimisation. "Solar Digital develops the system's software and hardware that brings together the customer's production, the power plant and the outside world, interconnecting the entire supply chain in an IIoT perspective".
