Does Togo have electricity?

In recent years, Togo has had one of the region's smallest electricity supplies (85 MW) and has had to import nearly 90% of its energy from Ghana & Nigeria. Today, the country is generating its own power with a 100 MW plant using natural gas or heavy fuel oil as main fuel and diesel as backup.

Why is energy important in Togo?

In a high-growth region like Sub-Saharan Africa, energy is critical to building a stable local economy. In recent years, Togo has had one of the region's smallest electricity supplies (85 MW) and has had to import nearly 90% of its energy from Ghana & Nigeria.

How is rural electricity steered in Togo?

In Togo, rural electricity projects are steered by the Rural Electrification and Renewable Energy Agency. Several companies, including BBOXX, EDF, and Sun King-Soleva, are actively working to promote universal access to electricity by developing innovative technologies and providing solar energy services to communities not connected to the grid.

How is Togo generating its own power?

Togo is generating its own power with a 100 MW plant using natural gas or heavy fuel oil as main fuel and diesel as backup. In a high-growth region like Sub-Saharan Africa, energy is critical to building a stable local economy.

Will Togo achieve 100% electricity coverage by 2030?

In its first phase, the project should reach 33,000 households. Togo hopes to achieve 100% electricity coverage by 2030, against 59% now. By then, the share of renewables in the energy mix should be 50%, according

What percentage of the Togolese population has access to electricity?

Less than half of the Togolese population has access to electricity. The country has a relatively diversified energy mix and more than 13% of its final energy consumption comes from renewable supplies of energy, mainly hydropower. Less than half of the Togolese population has access to electricity.
