Bring an eddi into your home and you can maximise the consumption of the 100% green energy generated from your solar PV or wind generation system. Rather than giving excess electricity ...

Introduisez un eddi dans votre maison et vous pourrez profiter pleinement de l'énergie 100% verte générée par votre système de production solaire PV ou éolien. Au lieu de la renvoyer au réseau, votre investissement dans la ...

How do I set up a boost on my eddi? How do myenergi products balance the grid in your property; How does diverting energy benefit me as a customer by using eddi? How eddi Handles ...

In my experience you will get temperature stratification with the Eddi depending on how much solar energy you can divert; in my system a battery gets priority until charged and the Eddi gets bursts of low energy and then finally all excess, the result is water at the top of the tank climbs way above the thermostat value until the water ...

Learn more about eddi. For technical information about eddi and how it can reduce both your carbon footprint and bills, check out our eddi product page. If you would like to learn more about eddi or any of our ...

On the app's home screen, the Eddi is showing as consuming surplus energy at a rate of 1.4kW, but on the graph screen, the "Consumed gen." is zero. Under the lower graph, the Eddi is shown as having used 3.5kWh and ...

The Eddi isn't a thermostat and relies on the immersion thermostat to signal a demand, so in your case the immersion has switched itself off. The Eddi detects no current flow and signals temperature reached.

Learn more about eddi. For technical information about eddi and how it can reduce both your carbon footprint and bills, check out our eddi product page. If you would like to learn more about eddi or any of our innovative, easy-to-use green products, we recommend giving us a call and speaking to the myenergi team. We will always have the time to ...

The MyEnergi eddi+ is an advanced 3-phase energy diverter, designed to maximise the use of your self-generated solar or wind power. By diverting excess energy to heat water or power other resistive loads, the eddi+ reduces reliance on the grid, enabling significant savings on energy bills while supporting eco-friendly living.

The eddi allows you to store energy as hot water or heat even when you are out. Later on in the day you are able to use this free hot water in the home. Without the eddi you will be paying up to 15.0p per unit to heat your water. You may as well make the most of your own generated energy whilst it's available.

On the app's home screen, the Eddi is showing as consuming surplus energy at a rate of 1.4kW, but on the graph screen, the "Consumed gen." is zero. Under the lower graph, the Eddi is shown as having used 3.5kWh and Home 4.7kWh.

I love the myenergi products so the eddi looks great but this leads me to some questions, especially around payback. Reading this thread ([eddi-a-year-on-the-savings-t4159.html](#)) it looks like the eddi could have a very long payback period but from my calculations above it looks like the eddi could have a very short payback. I am therefore ...

1 ?&#0183; Looking at Myenergi dashboard there's the dreaded yellow triangles, looking at Eddi specifically there's several blocks of yellow lines. How can the Eddi's failure to communicate affect the Zappi charging?

# Tunisia myenergi eddi

Or does it better indicate where any problem might lie? ... If your Eddi is determining EV charge issues, then it sounds like your ...

The eddi solar diverter logs all energy saving data to enable ongoing savings by optimising usage. There is also an intelligent daylight-saving time adjustment with overload and short-circuit protection for your peace of mind. Additionally, eddi is fully compliant with worldwide power grid standards and comes with a 3-year warranty. Explore eddi

Bring an eddi into your home and you can take full advantage of the 100% green energy generated by your solar PV or wind generation system. Instead of feeding it back to the grid, your energy generation investment becomes more efficient because our intelligent eddi product feeds energy back into your heating systems.

Absolutely, it's always best to have myenergi products installed together. You can prioritise where the energy goes, eddi and zappi will work together to try and consume as much free energy as possible. ... Varisine technology ensures that the power from the eddi is the same quality as that of the electricity that enters your property from ...

Eddi 3 Phase Energy Installation Manual. Collections are not permitted due to health & safety regulations. Myenergi Eddi 3 Phase Microgeneration Energy Diverter The My Energi Eddi is a ...

It works well with Eddi relay PCB. The wire is 1.5 meters. It came quickly first class (despite Royal Mails recent strike nonsense). £9.99 all in. The comprehensive menus for setting up the relay switching rules and sensor thresholds etc. magically appear in the Eddi menus when you install (plug in the ribbon connector) the relay expansion board.

My Eddi however, has been problematic. In 2021-2022, we had our house rebuilt to PassivHaus standard and the Eddi was installed alongside an ASHP setup for hot water ...

Today marks a year since we had an Eddi installed, it has diverted 235kWh to water heating, all sourced from Solar PV excess. My Eddi however, has been problematic. In 2021-2022, we had our house rebuilt to PassivHaus standard and the Eddi was installed alongside an ASHP setup for hot water and modest underfloor heating. At that stage I knew very little about it, but shortly after commissioning we started to experience problems with the ASHP setup reporting that the ...
