What is Uganda's Electricity capacity?

As of February 2015 and according to the Uganda Electricity Regulatory Authority, Uganda's installed electricity capacity was 810 megawatts, with peak demand of 509.4 megawatts so that "the incidence of load shedding due to shortage in supply is now close to zero."

Will Uganda double electricity capacity by 2019?

"Home National Uganda to double electricity capacity by 2019". New Vision. Kampala. Retrieved 13 March 2018. ^ "IFC and MIGA Boards Support Bujagali Refinancing Package to Reduce Ugandan Electricity Costs" (Press release). Washington, DC: International Finance Corporation. 8 March 2018. Archived from the original on 23 February 2020.

How many sugar manufacturers in Uganda have cogeneration capacity?

Five sugar manufacturers in Uganda have total cogeneration capacity of about 110 megawatts, of which about 50 percent is available for sale to the national grid.

How much power does Uganda have in 2023?

In December 2023, PML Daily, a Ugandan online publication reported that at that time, the national generation capacity was 1,346 megawatts, with a national electrification rate of 42 percent, which was expanding at an average rate of 3 percent annually. The national peak demand for February 2023 was reported as 863 MW.

Will Uganda become an energy importing country?

While much of the hydroelectric potential of the country is untapped, the government decision to expedite the creation of domestic petroleum capacity coupled with the discovery of large petroleum reserves holds the promise of a significant change in Uganda's status as an energy-importing country.

When will Uganda join OPEC?

In December 2017, Irene Muloni, Uganda's Energy Minister announced that the country planned to join the Organization of the Petroleum Exporting Countries (OPEC), by 2020, when first oil is expected.
