Solar power has a small but growing role in electricity production in the United Kingdom.. There were few installations until 2010, when the UK government mandated subsidies in the form of a feed-in tariff (FIT), paid for by all electricity consumers. In the following years the cost of photovoltaic (PV) panels fell, [1] and the FIT rates for new installations were reduced in stages ...

Without battery storage, solar energy must be used in real-time, with any excess released to the grid. Solar plus storage saves your unused energy for later, reducing your reliance on fossil fuels and grid energy. This stored solar electricity can then be used outside of daylight hours, during cloudy spells, or for periods of unusually high ...
