09/05/2024 September 5, 2024. US tariffs on Southeast Asian solar exports could further weaken solar panel producers in the European Union, but also help the EU's green agenda.

Much of the announced capacity in the United States concerns the final step of the solar module supply chain: module assembly. If the United States wants to establish an independent solar supply chain, it will need to incentivize the production of polysilicon, solar ingots, wafers, and solar cells, in order to feed this module demand.

On April 24, 2024, a group of domestic producers of crystalline silicon photovoltaic (CSPV) solar cells and modules filed a petition with the U.S. Department of Commerce (DOC) and the U.S. International Trade Commission (ITC) seeking the imposition of antidumping and countervailing duties (AD/CVD duties) on imports of CSPV cells and modules ...
