SMA Solar Technology AG (SMA) will expand manufacturing into the US with a projected start of production in 2025. SMA is working with multiple states and potential partners to evaluate the most strategic manufacturing location and approach. Site selection is anticipated in the first half of 2024. SMA plans 3.5 gigawatt of capacity per year... [Read more](#) »

The IEEE Power & Energy Society is a worldwide, non-profit association of more than 26,000 individuals engaged in the electric power energy industry. Our mission is to be the leading provider of scientific information on electric power and energy for the betterment of society and the preferred professional development source for our members ...

On 20 June, a major explosion at PES, the largest refinery on the east coast of the United States, compromised the facility's gasoline ...

IEEE PES General Meeting 2025 is held in Austin TX, United States, from 7/27/2025 to 7/27/2025 in J.W. Marriott Austin. Home > Power & Electrical Equipment Events ... IEEE Power & Energy Society (PES) 445 Hoes Lane, Piscataway, New Jersey, ...

Since inception in 2012, PES Energy and its owners have invested substantial capital to improve the Philadelphia refining complex. As a result, PES Energy has been able to continue to...

2025 IEEE PES Energy & Policy Forum ... We look forward to welcoming you to the Mile High City, named one of the top two best destinations to live in the United States by US News & World Report! With parts of the city sitting exactly 5,280 feet above sea level, Denver is located on high rolling plains, 12 miles east of the "foothills," a ...

He has completed policy and research work for the U.S. Department of Energy, the Korean government, and the Brookings Institution, among others. His most recent work focuses on regional transmission organization (RTO) governance, including the development of organized electricity markets in the western United States.

Climate change threatens our quality of life and the habitability of planet Earth for many species. The Intergovernmental Panel on Climate Change estimates that, to reduce the risk that global temperature increases more than 2 °C above preindustrial levels, greenhouse gas (GHG) emissions in developed countries must fall by approximately 80% below 1990 levels by 2050. ...

United States: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
