Who is winch energy?

Winch Energy is a global, off-grid renewable energy developer and technology designer and integrator. We focus on Renewable Energy and Energy Efficiency projects in Sub-Saharan Africa. With our Remote Power Units, the "RPU", we provide a clean energy solution for the 840 million people around the world without access to electricity.

How does winch Energy Fund off-grid projects?

Winch Energy develops off-grid projects and provides its own technology, which is unique for the industry. The organisation also has \$100 million off balance sheet funding platform with EDF, Mitsubishi and Meridiam (Neot Africa) which provides debt and equity funding to enable Winch Energy to build and operate its projects.

Why did winch energy get a loan from Repp?

Winch Energy has previously invested significantly in development activities, including pilot projects to prove the viability of its projects and technology. REPP's loan will enable the company to scale up its operations, which in turn will improve the likelihood of securing more funding and building further mini-grids.

He is responsible for the financial control of the Winch Energy Group and to drive best accountancy practice, he has implemented a cloud-based accounting system across the Winch Energy Group, which includes six overseas subsidiaries in Italy and Africa. As well as ensuring that each company within the group complies with various statutory ...
